PROFESSIONAL SUMMARY

I love story-telling and build narrative around the data. I realized that it's an essential tool for solving problems and driving results. My technical background in computer science led me to marketing and analytics role. Currently, I'm expanding my knowledge by taking Master's in Digital Business and Innovation to bridging the gap between business and technology. Since, I'm finishing my study soon, I'm excited to bring my passion for storytelling and data-driven strategy to a new opportunity.
